

Crossborder trainings

Certified training
online courses for EAMs

In partnership with APIAX

A unique training offer. Available immediately.

In partnership with APIAX and Ernst & Young, VisionCompliance now enables EAMs to take crossborder training online courses and obtain a certification in the subject. Get accreditation for your crossborder knowledge and meet the regulator's expectations.

The training course, which is available in VisionCompliance's online shop, introduces the most important cross-border rules for the selected country and is regularly updated.

Apiax Apps gives you quick and easy access through your mobile or computer to the crossborder compliance rules of your customers' countries. The solution focuses on the appropriate behaviours to remain in compliance with the crossborder rules and thus reduce your risks.

This partnership provides direct access to Ernst & Young's crossborder content on both Apiax application and during training.
